

Testing M1811 Grip Module - Participant

Brouwer LLC would like to expand its testing by encouraging its users to submit their own testing observations. In order to qualify your data for submission, a minimum score of 75 points is required on the 25 yard bull.

Participant Details:

Name (or Identity)	Occupation (optional)	Experience Level	USPSA # (optional)

Configuration (check all that apply):

Module / Platform:

- M1811 Grip Module
- Sig Sauer Legion
- Icarus
- Wilson Combat
- Staccato P
- Other: _____

Sights:

- Iron Sights
- Red Dot Optic
- Other: _____

Options:

- Extended Magwell
- Light
- Other: _____

Each configuration will be allocated a standalone day for testing. Participants will only perform this assessment on one configuration in a day. Starting fresh for each iteration, all participants will perform the assessment in the same order, using the same ammunition.

Ammunition used: _____

Drill: Bulls

25 Yards, 10 rounds, shot on NRA B8 target with no time limit, for score. This Drill is repeated three times per configuration.

	Score:	Number of "X" ring hits:
String 1:		
String 2:		
String 3:		

Drill: 1 Shot from Holster

7 yards shot on NRA B8 target for time and score.

Shooter stands on the line in the ready position with hands at their side below the waistline. At the sound of the timer, the shooter draws the weapon and places one round as quickly as is accurate on the target. This is repeated 10 times. The hits are then added together according to their placement within the NRA B8 for a total score.

	1	2	3	4	5	6	7	8	9	10
Time:										

Score: _____

Drill: Bill

7 yards shot on IPSC/USPSA target for time and score.

Shooter stands on the line in the ready position with hands at their side below the waistline. At the sound of the timer, the shooter draws and fires 6 shots as quickly as is accurate on the target. This is repeated a minimum of three times. Record the time and the location of the hits.

	Time	Number of Hits		
		A zone	C zone	D zone
String #1				
String #2				
String #3				

Drill: Shot to Shot Reload

7 yards shot on IPSC/USPSA target for time and score. Shooter stands on the line with their weapon pointed at the target and their finger on the trigger. After the sound of the timer, when the shooter is ready, the shooter fires the weapon, performs a slide lock reload, and fires again. The time between the first shot and the second shot is recorded (the split), as the amount of time it takes to perform a slide lock reload. This is repeated ten times, record the split time for each iteration, then total hits.

	1	2	3	4	5	6	7	8	9	10
Split Time:										

Number of Hits		
A-zone	C-zone	D-zone

This document is made available to anyone that would like to participate in the ongoing endeavor to document relative performance differences between grip modules for the Sig Sauer P320. By participating and submitting your findings you agree that Brouwer LLC can release this information without restriction.
